7	Submission Date	2019/02/07

8	Correction Number CP-1887
9	Log Summary: Correct eyelid and supraorbital anatomy codes.
10	Name of Standard
11	PS3.3
12	Rationale for Correction:
13	The incorrect code Mayo code for right skin of upper eyelid is used.
14	The incorrect NYU MMCCG codes for eyelashes were also used for upper eyelids.
15	Neither the NYU MMCCG nor Mayo schemes actually assign codes to the skin between the upper eyelid proper and eyebrow.
16	SNOMED has retired "suprorbital" on the basis that it is equal to "eyebrow" (2019 JAN INT release).
17	The hierarchical anatomy scheme (http://anatomymapper.com/terms/), and the corresponding ICD-11 extensions, do distinguish supraorbital from eyebrow, with the latter a child of the former, and also distinguish upper eyelid.
18	
19	However, per https://emedicine.medscape.com/article/834932-overview#a2 , "the upper eyelid extends superiorly to the eyebrow, which separates it from the forehead", so there seems to be no need for distinct concept. I.e., the upper eyelid spans the superior palpebral sulcus and extends to the edge of the orbit where the eyebrow nominally begins.
20	
21	
22	Also, do we need to add: superior palpebral sulcus (FMA:59209), inferior palpebral sulcus (FMA:59210)
23	<i>[Ed. Note: The removal of Skin of supraorbital area may also be addressed by CP1808 in relation to SNOMED subset maintenance.]</i>
24	Correction Wording:

Amend DICOM PS3.16 as follows (changes to existing text are bold and underlined for additions and ~~struckthrough~~ for removals):

CID 4029 Dermatology Anatomic Sites

Resources: HTML | FHIR JSON | FHIR XML | IHE SVS XML
 Type: Extensible

DCM	130322	Skin of upper eyelid margin				XA53T1	107		106	107		106

Note

1. ...

2. ...

3. ...

4. ...

5. ...

6. ...

7. ...

8. ...

9. No distinction is made between the eyebrow and the supraorbital area, which SNOMED CT now considers equivalent.
