

DICOM Correction Proposal

STATUS	Final Text
Date of Last Update	2020/01/16
Person Assigned	Jim Philbin <jim@philbin.us>
Submitter Name	Jim Philbin <jim@philbin.us>
Submission Date	2018/03/26

Correction Number	CP-1925
Log Summary:	PS3.18 Section 8.3.1 has syntax mistakes
Name of Standard	PS3.18 2019e
Rationale for Correction:	Fix syntax so that it is correct.
Correction Wording:	

Update PS3.18 Section 5.3.1 as follows:

8.3.1 Query Parameter Syntax

Query parameters have the following syntax:

```
query-parameters = "?" parameter [*( "&" parameter )]
```

Each parameter after the first, is separated from the following parameter by the "&" character. Each parameter has the following syntax:

```
parameter = qp-name  
           / qp-name "=" 1#qp-value  
           / qp-name "=" 1#attribute  
           / attribute  
           / attribute "=" 1#qp-value
```

The qp-name is case sensitive, and starts with an alphabetic or underscore character, followed by zero or more alphanumeric or underscore "_" characters:

```
name qp-name = %s DQ 1*(ALPHA / "_") *(ALPHA / DIGIT / "_") DQ
```

A qp-name by itself (with no values) is a legal Query Parameter. A parameter ~~<name>~~ **qp-name** may also be followed by a comma-separated list of one or more qp-values, or one or more Attributes.
