8	Correction Number CP-1945	
9	Log Summary: Add coding scheme designator for RadElement	
10	Name of Standard	
11	PS3.6, 3.16 2019e	
12	Rationale for Correction:	
13	RSNA has a Common Data Elements (CDEs) initiative that assigns codes to concepts representing such elements (questions, names	
14	of name-value pairs). These are distinct from the RadLex codes used for concept values (answers, value of name-value pairs).	
15	Though some or all of these may ultimately be mapped to other terminology standards (e.g., RadLex, SNOMED CT, LOINC) but in	
16	the interim, a coding scheme is needed.	
17	E.g., (RDE65, RADELEMENT, "LI-RADS assessment category") = (RID49796, RADLEX, "LR-3"). This particular example actually	
18	does have a RadLex mapping for the element/question/name, to (RID49823, RADLEX, "LI-RADS assessment").	
19	Correction Wording:	

Amend DICOM PS3.16 as follows (changes to existing text are bold and underlined for additions and ~~struckthrough~~ for removals):
