

HISTORY OF DICOM, PACS & U-HOSPITAL IN KOREA

Hee-Joung Kim, Ph. D

Dept. of Radiation Convergence Engineering
College of Health Science
Yonsei University

Medical Physics & Imaging Lab.

Wonju-LINC, Yonsei University

CONTENTS

- I Past conference of DICOM Workshop
- II 2015 conference of DICOM Workshop
- III History of DICOM & PACS in Korea
- IV History of IHE in Korea
- V History of u-Hospital
- VI Summary

I. Past conference of DICOM Workshop

1

THE HISTORY OF DICOM CONFERENCE

Conference at Baltimore, MD in 2003

Conference at Budapest in 2005

Conference at Chengdu
in 2008, 2014

Conference at Rio de Janeiro in 2010

Conference at Bangalore in 2013

**2015 CONFERENCE
AT YONSEI UNIV. WONJU
IN KOREA**
August 27, 2015

II. 2015 conference of DICOM Workshop

2

DICOM conference at yonsei university

DICOM Workshop 2015
Wonju, Korea
August 27, 2015

www.dicomconference.org

Start Aug. 27	Minutes	Title	Presenter
08:15	45	Registration	
08:30	20	Welcome to the DICOM Workshop and to Yonsei University	Yonsei Univ. (TBA), KSIM(President), WMIT (President), INFINTT (President), Harry Solomon
08:40	5	Overview of the Program	Harry Solomon
08:45	25	History of DICOM, PACS, and u-Hospital in Korea	Hee-Joung Kim, Ph.D, Yonsei Univ.
08:50	25	DICOM Overview: Stability and Evolution	Kevin O'Donnell, Toshiba
09:15	30	Open Source DICOM Projects in Korea	Samuel Choi, Ph.D, IRM Inc.
09:45	30	BREAK	
10:15	30	Radiologist's Digital Workspot today and tomorrow	John Carrino, MD, American College of Radiology
10:45	20	Reporting Workflow in Radiology using DICOM SR Integration	John Carrino, MD, American College of Radiology
12:05	70	LUNCH	
13:15	20	Analytic Workflow: From Images to Reports	Kevin O'Donnell, Toshiba
13:35	30	Capturing Analysis: Measurement, CAD, Segmentation and more	Harry Solomon, GE Healthcare
14:05	30	Nuclear Medicine PACS and DICOM application	Tae-Sung Kim, M.D, National Cancer Center
14:35	30	Development and use of next generation PACS	Jung Bin (Ben) Kim, INFINTT Healthcare
15:05	20	BREAK	
15:25	30	Deploying it [DICOM] effectively: Some Assembly Required	Kevin O'Donnell, Toshiba
15:55	30	DICOMweb™ and interoperability	Harry Solomon, GE, DICOM Co-Chair
16:25	20	Summary, Q&A, wrap-up	
16:45		Adjournment

Digital Imaging and Communications in Medicine

2015 DICOM Workshop in Korea

August 25, 2015 – WG-10&WG-29 meetings

August 26, 2015 – DICOM Standards Committee meeting

August 27, 2015 – DICOM Workshop

Host and organizers

Hosted by: Yonsei University, Wonju-campus

Organized by:
 - Wonju-LINC (Leaders in Industry-university Cooperation), Yonsei University
 - DICOM Standards Committee

Sponsors

- KSIM (Korea Society of Imaging Informatics in Medicine)
 - INFINTT Healthcare Co., Ltd.
 - Wonju Medical Industry Techno Valley
 - Korea Research Institute of Standards and Science
 - GE Healthcare Korea
 - BK21+

Location

The Workshop and meetings will be held at:

Sanhakkwon & Miraekwan, Yonsei University Wonju-campus, Yonseidaegil 1, Wonju, Gangwon, South Korea
<http://www.yonsei.ac.kr/wonju/>

Specific location

August 25-27 – Office of Local Organizing Committee

Office Room #505 Sanhakkwon

August 25 – WG-10&WG-29 meetings

August 26 – DICOM Standards Committee meeting

To be held at:

International-Conference Room,
 #503 Medical Industry Venture Center

August 27 – DICOM Workshop

To be held at:

Lecture hall, #437 Miraekwan

Opportunity for sponsoring

The Workshop will be free to attendees; all companies and organizations are invited to join in sponsoring the Workshop by joining the sponsors already committed

To discuss sponsorship, please contact:

Hee-Joung Kim, Professor, Yonsei University
 Tel: 033-760-5270
 Email: hjk1@yonsei.ac.kr

Medical Physics & Imaging Lab.

Wonju-LINC, Yonsei University

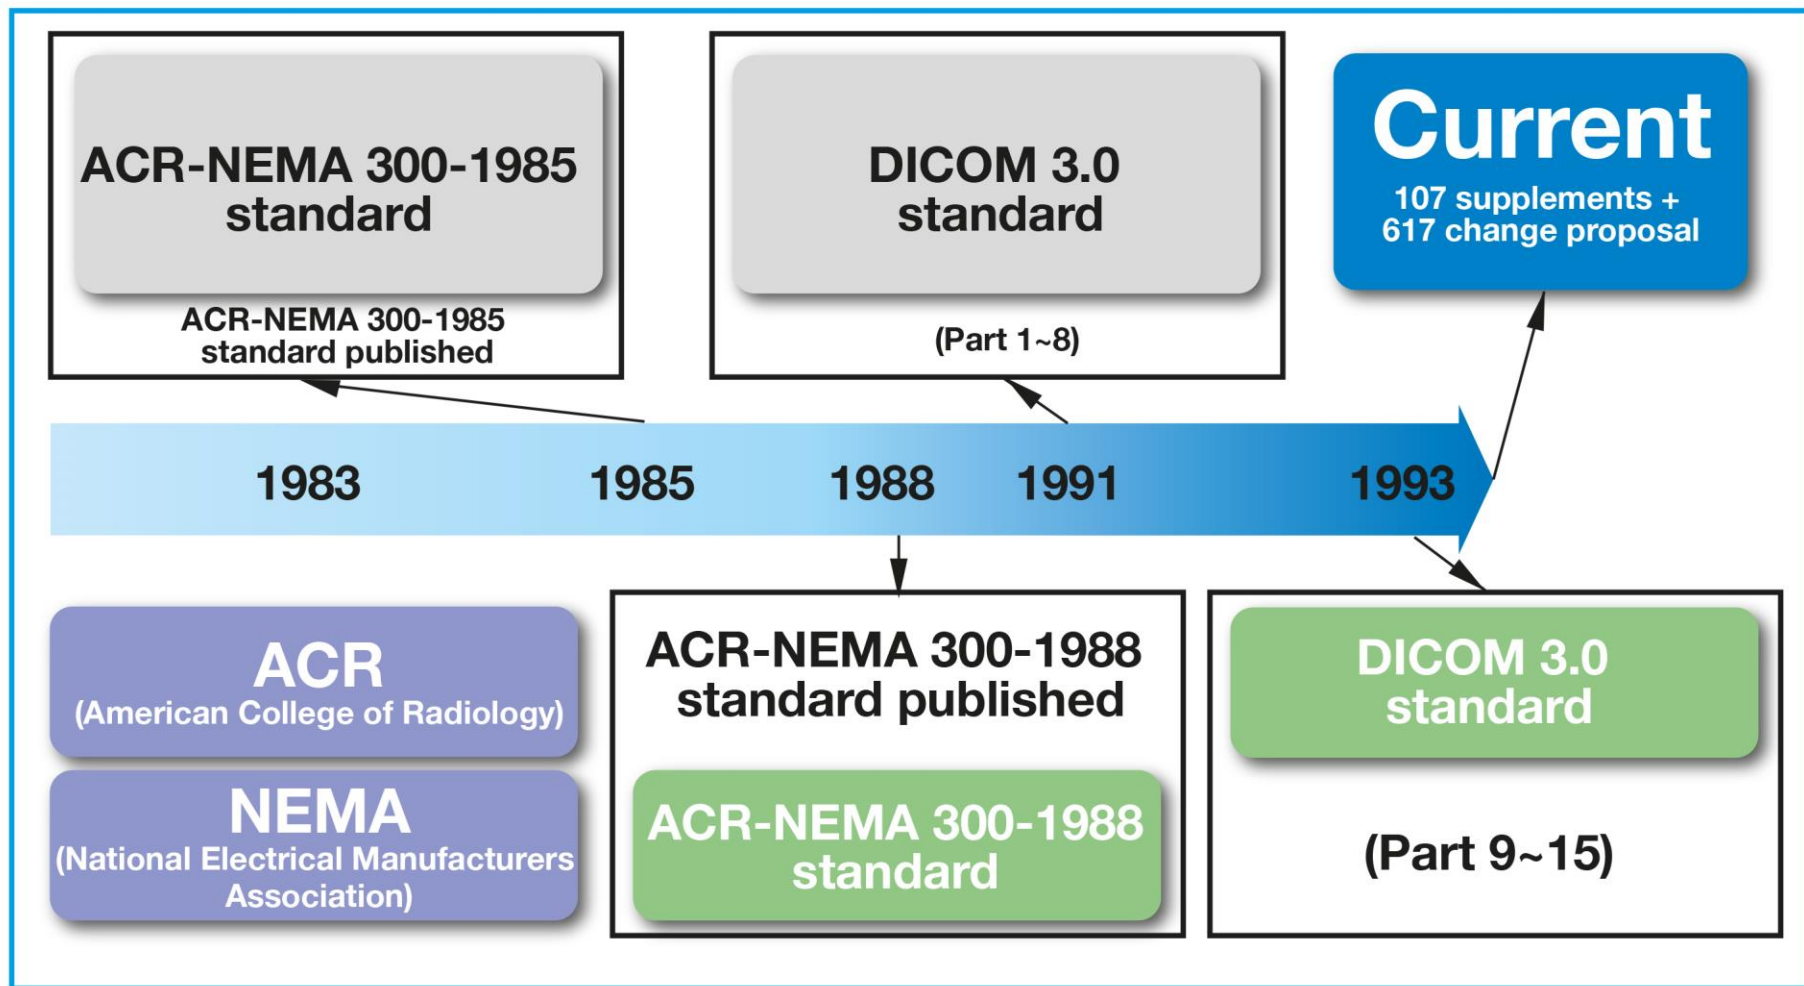

DICOM COMMITTEE MEETINGS at WONJU KOREA: August 25, 26th, 2015

II. Development of DICOM

3

II. DICOM 3.0

4

The goals of DICOM...
are to achieve compatibility and to improve workflow efficiency
between imaging systems and other information systems in healthcare
environments worldwide.

III. DICOM in Korea: Background

5

- **1993-Society of Korean PACS**
- **1995-1999-G7 PACS project : SNUH, KAIST, Marotech-J.H.Kim**
- **G7 PACS project in 1997**
 - Standardization of PACS Spec in Korea
 - Translate English DICOM into korean
 - Develop Hangul code
 - Cost analysis of PACS installation
 - Develop test station for PACS
- **Fast growing PACS installation**

- **Formed October 22, 1998**
- **Objectives**
 - Exchange DICOM and PACS related information
 - Collaboration w/ international DICOM Committee
 - Continuous efforts for DICOM after G7 project
- **May 5-7, 2002: International DICOM Meeting in Korea**
- **July, 2006: DICOM validation tool kits-KFDA-by H.J. Kim**

III. DICOM in Korea: International DICOM Seminar

7

대한 PACS 학회

THE KOREAN SOCIETY OF PICTURE ARCHIVING AND COMMUNICATIONS SYSTEM

서울특별시 송파구 풍납동 388-1
서울중앙병원 방사선과
138-736
TEL 02-3010-4400/4399
FAX 02-476-4719

Department of Radiology
Asan Medical Center
388-1 Pungnap-dong, Songpa-gu
Seoul 138-736
Korea

대한 PACS 학회 2002 년 춘계학술대회 및 DICOM seminar 일정

일시 : 2002 년 5 월 5 일(일)
장소 : 코엑스 인터컨티넨탈호텔 비바채 룸

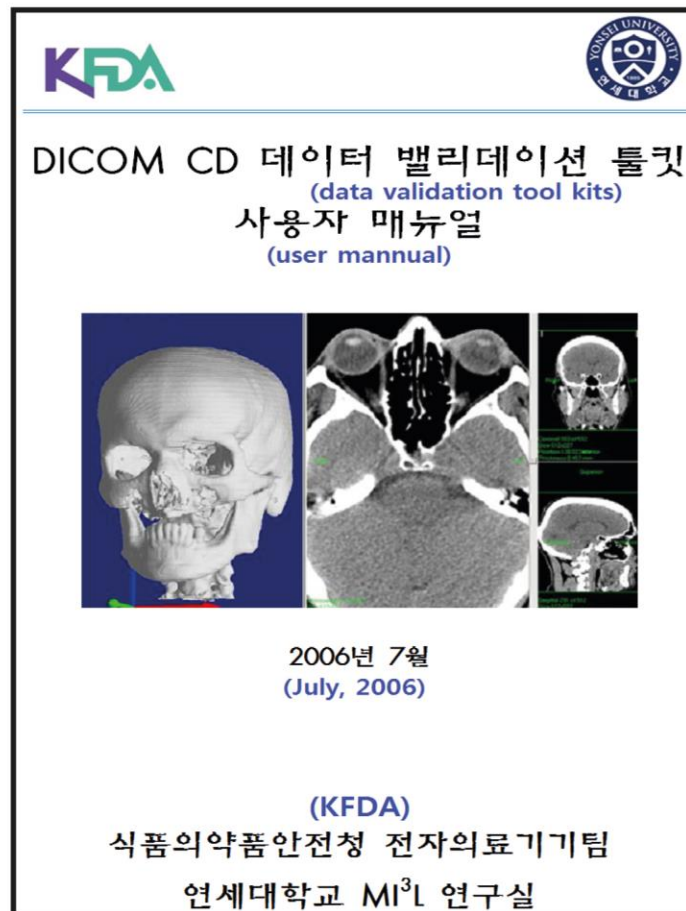

DICOM seminar 09:00 – 12:00

09:00-09:30	Current status of DICOM	Clunie
09:30-09:50	DICOM and ISO	Shinoda
09:50-10:30	MR Multi-frame object	Parisot
10:30-11:00	DICOM and IHE	Loef
11:00-11:30	DICOM and the Web	Cordonnier
11:30-12:00	directions in Structured Reporting	Heaney

춘계학술대회 13:30 – 17:00

III. DICOM in Korea: CD Validation Tool Kits

8

III. DICOM in Korea: K-DICOM Members in Early Stage

9

Vendors	Name	Tel	Email / Fax
Mediface	HS Choi	365-3323	hschoi@mediface.com

SMC	CW Paik	3410-2507	chpaik@smc.Samsung.co.kr

III. DICOM in Korea: Initial role K-DICOM

10

- Define PACS Spec in Korea
- Develop DICOM Hangul Code
- K-DICOM, JIRA/DICOM, and CTN
Collaboration will help to implement and use multi-byte characters with DICOM in real world
- K-DICOM committee plays an important role for promoting PACS as well as K-DICOM

III. PACS

11

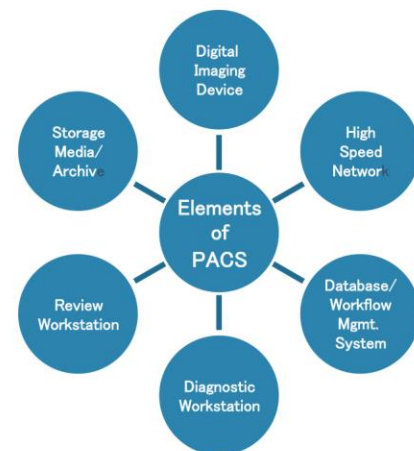

“Picture Archiving and Communication System”

P: Picture, Images & Reports

A: Archive, Online, Near line, Offline

C: Communication, Networking, Transfer Protocols

S: System, Components & Architecture

PACS : for storage and distribution of images and information when necessary

Imaging Modality

Archiving

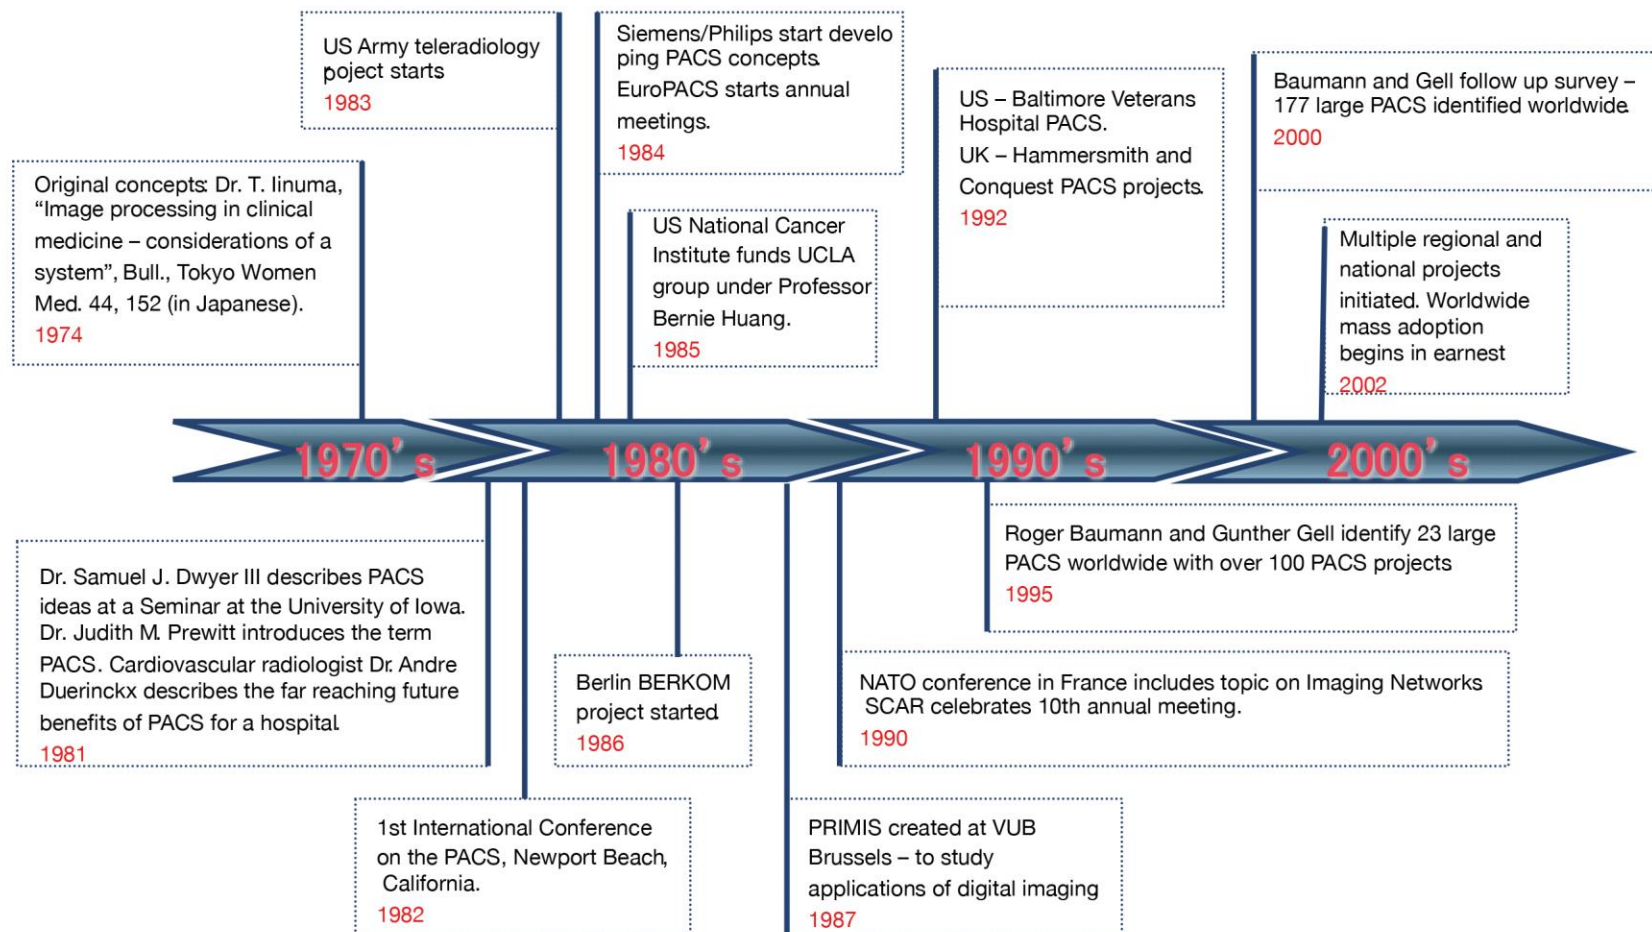

Communication

Computer Reading

III. PACS History– Overseas

12

III. PACS History in Asia: Korea

13

Major Events in PACS history in Korea

Year	Events
1986	The first pilot PACS in Seoul National University
1994	The Korean PACS Society was established
1994	Samsung Medical Center launched a partial scale PACS
1999	PACS reimbursement act approved by Korean government
1999	Full scale filmless hospitals by domestic companies
2001	HL-7 based interface between HIS-PACS in Seoul National University
2004	The IHE Korea was established

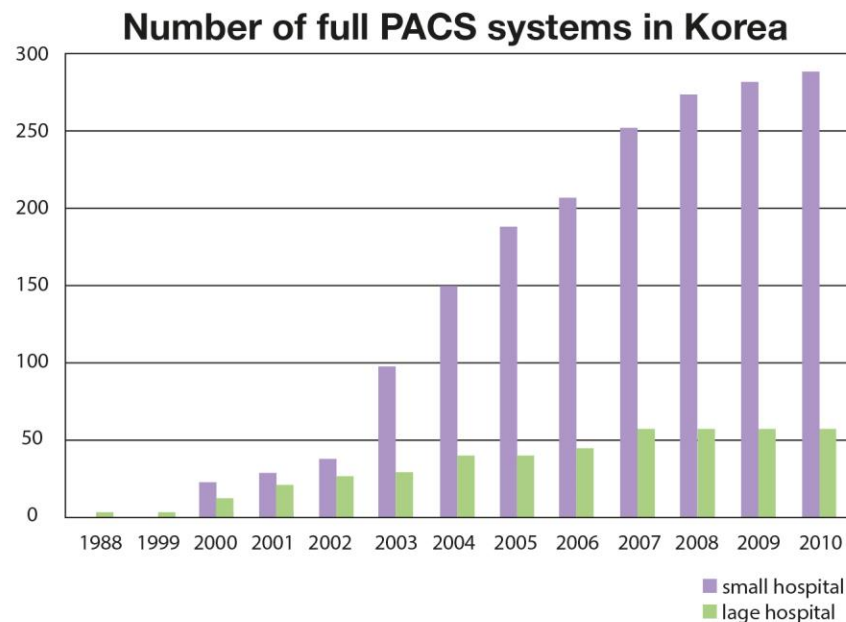

Only 4 years later from 1982 when the 1st word of PACS appeared in USA, the 1st PACS in Korea was tried in SNU in 1986

K. Inamura, J.H. Kim, European Journal of Radiology, 2011

III. PACS History in Asia: Korea

14

Major Events in PACS history in Korea

The number of full PACS systems installed in Korea

K. Inamura, J.H. Kim, European Journal of Radiology, 2011

III. PACS History in Asia: Korea

15

Major Events in PACS history in Korea

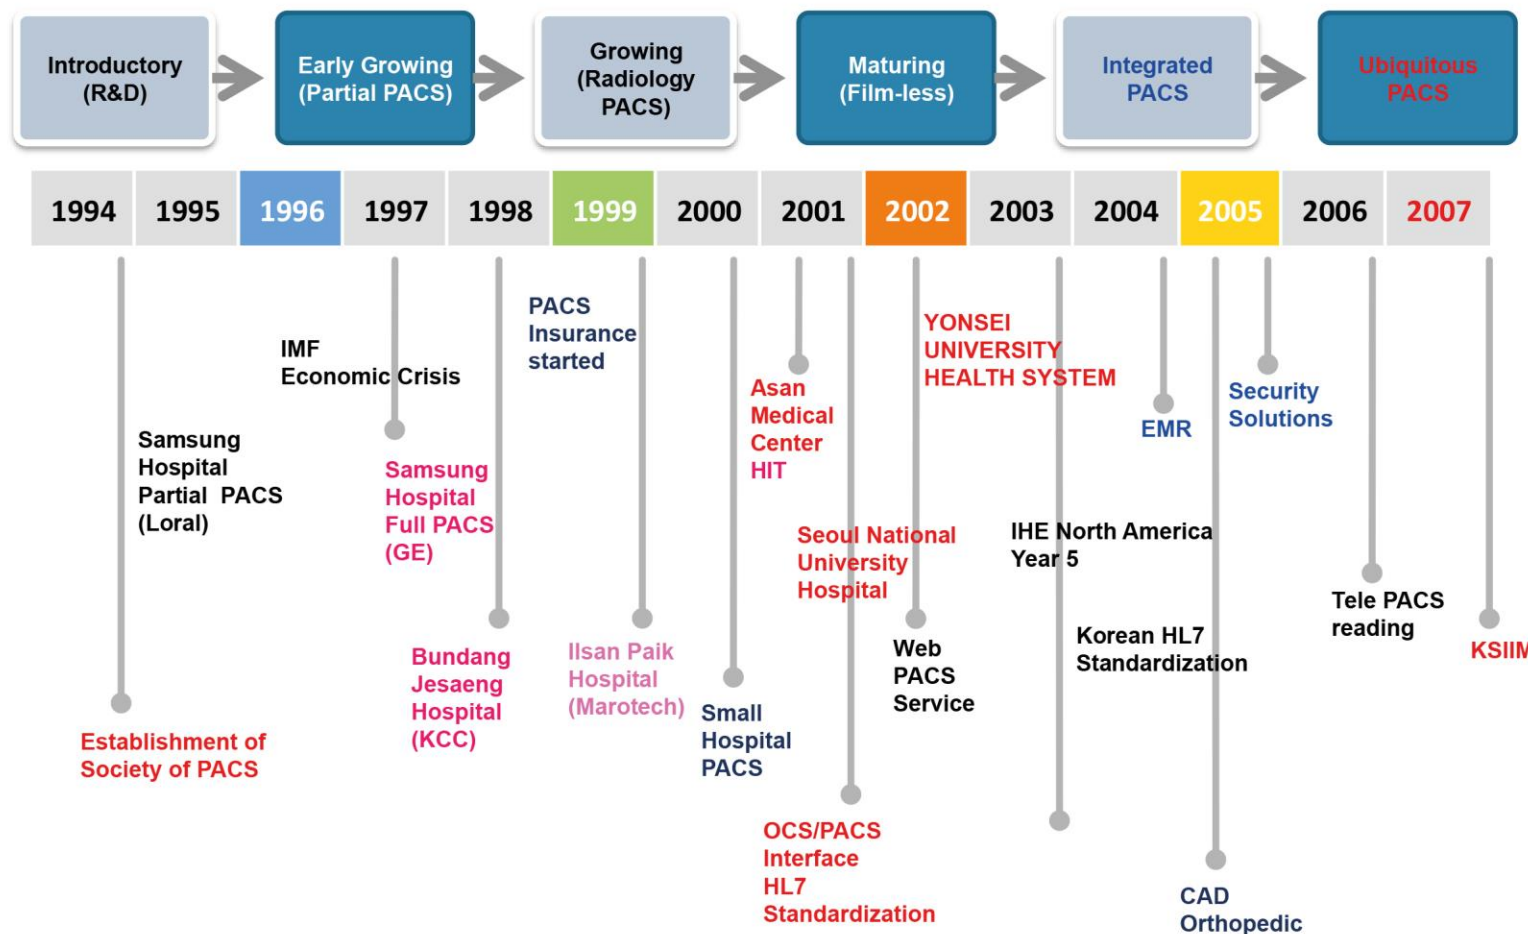

No.	Hospital	Number of beds	Number of connected modalities	Number of terminals	Annual generation of image data (TB)	Implementation
1	Seoul National University Hospital	1500	250	3000	27	Cooperative development with a domestic company since 1995
2	Samsung Medical Center	1200	190	3000	25	Purchase from a foreign company in 1994
3	Asan Medical Center	2200	250	3500	24	Cooperative development with a domestic company since 1995

Large number of connected modalities and display terminals reflects their complete filmless PACS operation covering all imaging modalities across the hospital

K. Inamura, J.H. Kim, European Journal of Radiology, 2011

III. PACS History: Korea

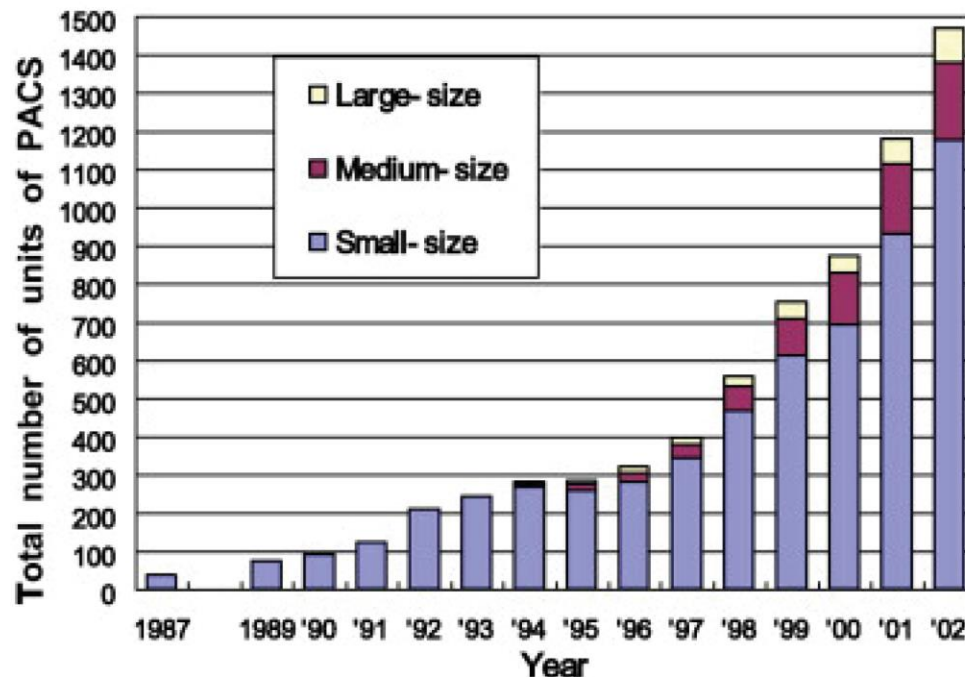

16

III. PACS History in Asia: Japan

17

The chronological change of PACS diffusion from 1987 to 2002 in Japan

Progress of PACS diffusion in Japan during years 1987–2002. Even small-size PACS of 1173 units in 2002 had function for image collection, storage, image processing, display, hard copy and image transmission through network

K. Inamura, J.H. Kim, *European Journal of Radiology*, 2011

III. PACS History in Asia: Japan

18

History of PACS in Japan during years 1984–2002

Year Events

Small size and medium size PACS

1984 MedFile series (NEC), NEPACS Enterprise (NEC)

1988 TDS-File (Toshiba)

1984 Film digitizer by CCD (NEC)

1986 Image compression hardware (NEC)

Large size PACS

1984 Experimental PACS in Osaka University (NEC)

1989 Clinical PACS in Hokkaido University (NEC)

1989 Experimental PACS in Kyoto University and Nagoya University

Teleradiology

1984 Experiment in Nagasaki Pref. (NEC)

1987 Experiment by satellite communication in Harumi (Toshiba)

1989 Commercial teleradiology (SECOM)

Standardization activities

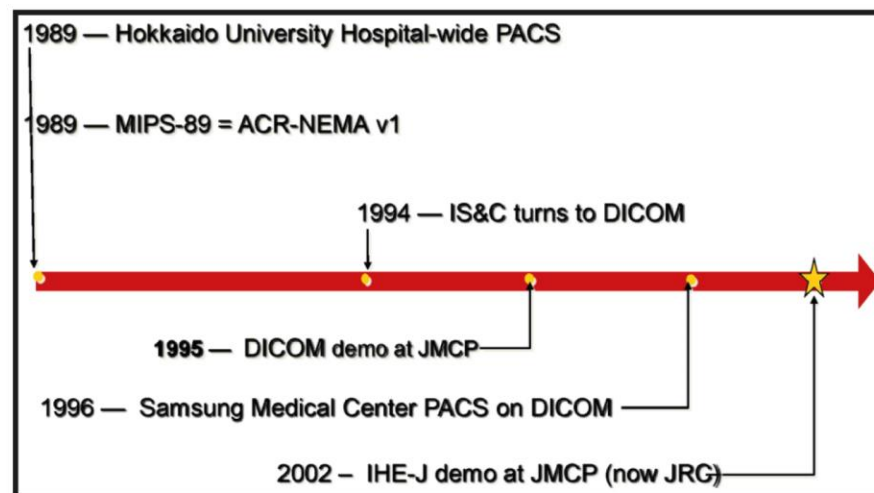

1984 Standardization by JIRA following ACR-NEMA

1984 IS&C (Image Save and Carry) started

1985 DICOM in Japanese version

2002 IHE-J demonstration (JIRA, JRS, JSRT, JAHIS)

Only 2 years and 4 years later from 1982 when first terminology of PACS appeared in Newport Beach in USA, dedicated hardware for film digitizing and image data compression were commercialized by a domestic manufacturer in 1984 and 1986 in Japan, respectively.

Standardization activity at early stage in Japan until 2002

K. Inamura, J.H. Kim, European Journal of Radiology, 2011

III. PACS History in Asia: Japan

19

PACS with HIS, EPR, RIS

PACS with Moving Picture, 3D

The number of hospitals equipped with PACS, EPR, RIS and HIS

The number of hospitals equipped with moving picture and 3D

K. Inamura, J.H. Kim, European Journal of Radiology, 2011

III. PACS History in Asia: China

20

The history of PACS in China

Year	Events
1994	The first mini-PACS in Beijing Union Medical College Hospital
1996	The first DICOM 3.0 compatible PACS in affiliated hospital of West China Medical University
1997–1998	PACS was growing slowly because of only UNIX workstation, DICOM software package only for UNIX, the less of DICOM imaging modalities and Asia Financial Crises
1998	The academic community summarized the experience in the practice of PACS
1999	The Ministry of Health in China approved integrated and applicable PACS
1999–2001	Eleven hospitals imported MiniPACS from abroad
2000	Shanghai Jiao Tong University developed their own image archive server of low cost
2001–2002	Eight hospitals purchased whole hospital PACS systems. Among them 4 systems were from Chinese domestic vendors
2003	Affiliated Hospital, Guiyang Medical College reported construction and cabling of PACS and the equipment which formed the necessary platform to run PACS and HIS. There were more than 50 terminals. All components were from manufacturers outside China A boom of PACS adoption by SARS crisis National projects started to develop health IT standards unique to China
2004	Healthcare professionals established a relationship with the U.S. IHE organization, with a view to launching IHE-China
2005	A draft of DICOM 3.0 compliant PACS with Chinese characteristics
2007	Shenyang city Hospital of 2300 beds replaced their CRT monitors by LCD technology The first Connectathon by IHE-China. Five vendors participated
2008	The functionality of IHE workflow profiles in RIS/PACS installations
2009	The Sun Yat-sen University in Guangzhou, decided to convert completely to digital radiology
2010	Hong Kong Sanatorium and Hospital linked an agreement of PACS monitoring, database-driven reporting and HIPAA/audit log management.

In spite of slow start of PACS installation in Chinese hospitals, very acute build-up to catch up with global level is observed

K. Inamura, J.H. Kim, European Journal of Radiology, 2011

III. Introducing process of PACS system in Severance

21

Before & After Introducing PACS system

STPA

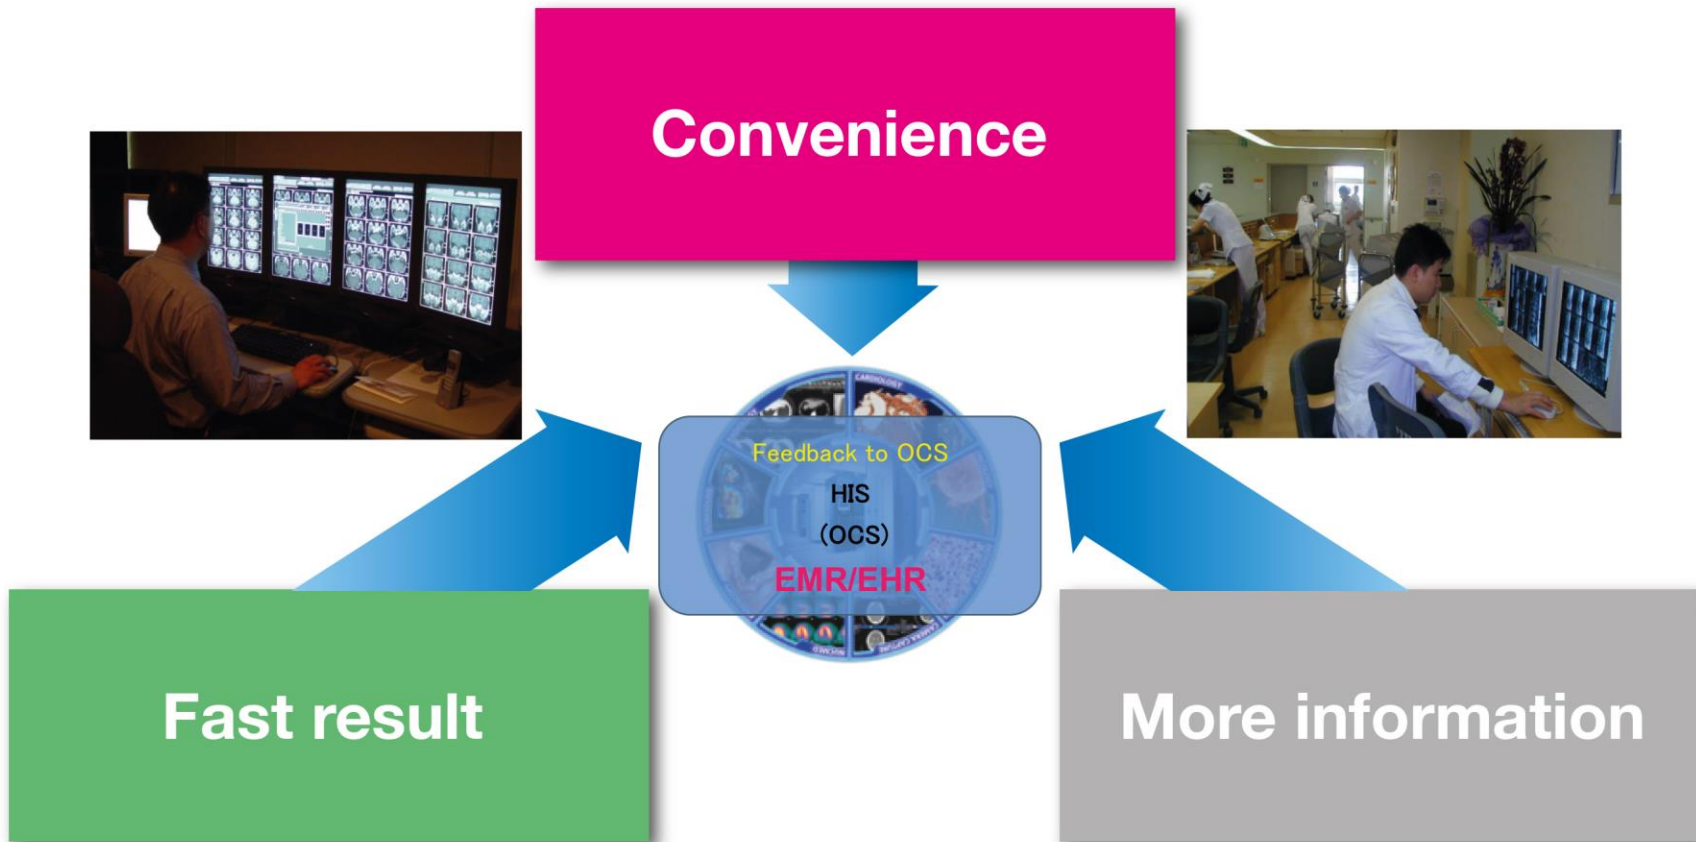

CURRENT

III. Benefits of PACS

22

From PACS to EMR/EHR

III. Benefits of PACS

23

PACS served as  to the hospital administrators
to see “Digital Hospital”

Imaging Informatics will serve as  Windows Vista
to the “ubiquitous Hospital” in next generation

Windows Vista

For Father's Day:
TV and movies on your time

Windows Vista Ultimate

Help and how-to

 **Personalize your PC**
Change how it looks, sounds, and acts

Windows Easy Transfer

Easily move files & settings to a new PC

 **Windows Vista**

-  **Are you ready for Windows Vista?**
Use our Upgrade Advisor to get ready.
-  **Great deals on software, PCs**
See special offers from our trusted partners.
-  **Tips and tricks delivered to you**
Get Windows tips, advice, and news in your inbox.

III. Introducing process of PACS system in Severance

24

Pursuing history of PACS in Severance (2000 ~ 2005)

III. KSIIM (PACS->KSIIM)

25

KSIIM (Korean Society of Imaging Informatics in Medicine)

2015 KSIIM annual meeting Yonsei university Wonju-Campus

KSIIM (Korean Society of Imaging Informatics in Medicine)

IHE Beginnings

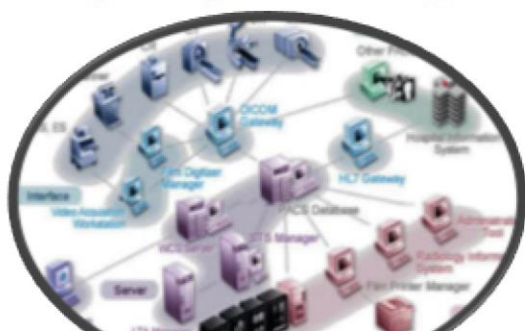

- **1982-1992: ACR-NEMA Image Standards**
: Despite ten years of developments, standards were not widely implemented.
- **1992: Birth of DICOM marked with public demonstration at RSNA annual meeting**
: Galvanizes imaging community and industry support of standard

IV. Concept of Connectathon

27

Connect(ivity + Mar)athon

Connectivity

Marathon

Connectathon

A series of tests with multiple vendors walking through use cases derived from the Technical Framework.

IV. History of IHE in Korea (<http://www.ihekorea.org>)

28

- Founded in June 25th 2004 with support of both KSIIM and KSOMI
- Many activities including education, workshop, panel discussion, demonstration, connectathon, and show case demonstration

IV. History of IHE in Korea (<http://www.ihekorea.org>)

29

IV. History of IHE in Korea

30

IHE KOREA 2004 - 2005 Demonstrations

2004 PACS and KSMP conference

2005 KOSMI conference

IV. IHE in Korea-2014 RSNA

31

- IHE GDC committee meeting
- Report: 2014-activities of IHE Korea
- Plan: 2015-activities of IHE Korea

Ubiquitous

- From Latin *ubique*: 『Being everywhere at once: omnipresent』 ,
『Seeming to appear everywhere at the same time』
- Evolution of Computing Paradigm
 - : Mobile Computing - “anytime, anywhere”
 - : Ubiquitous Computing – “all the time, everywhere”

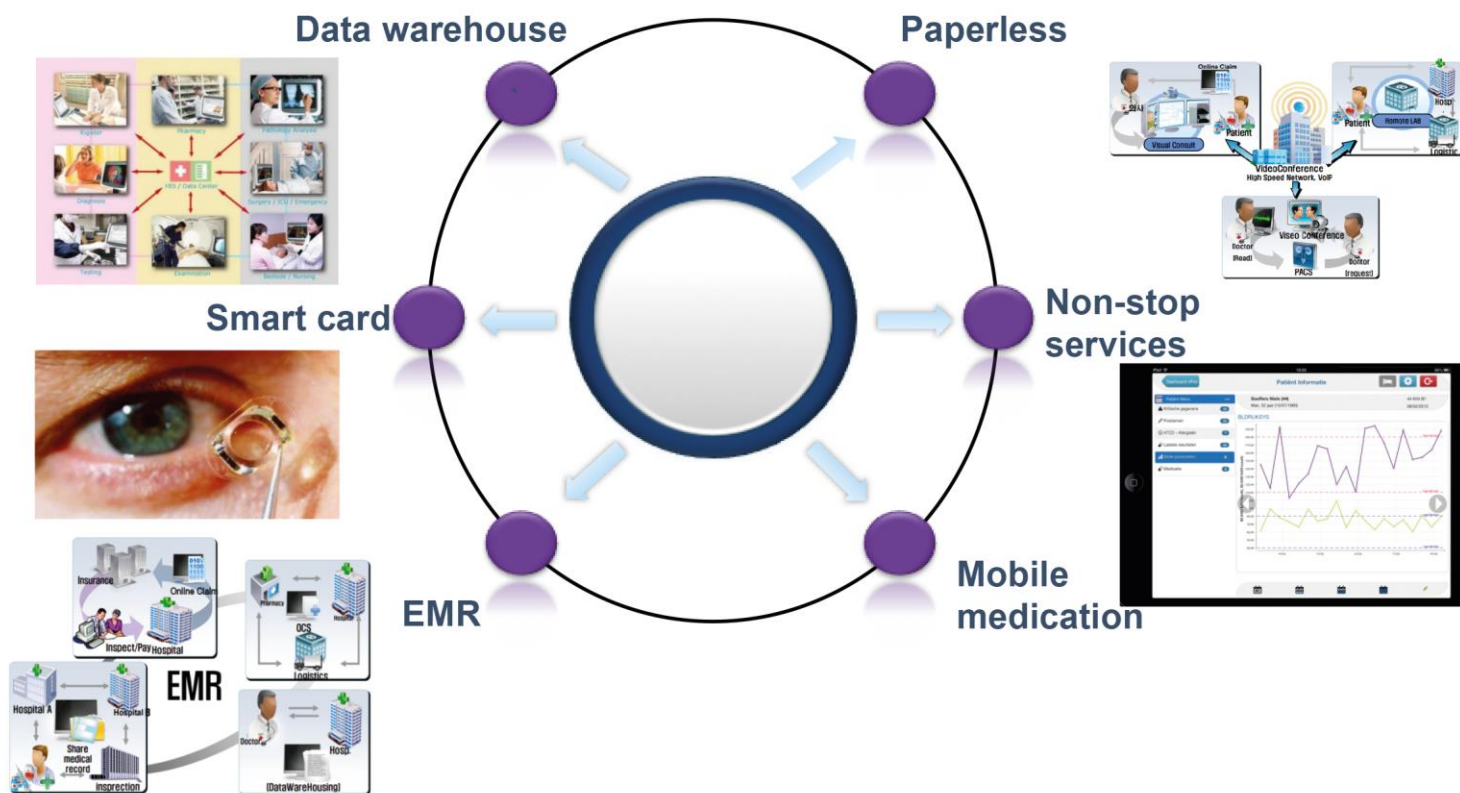

Ubiquitous

V. Introduction of u-Hospital

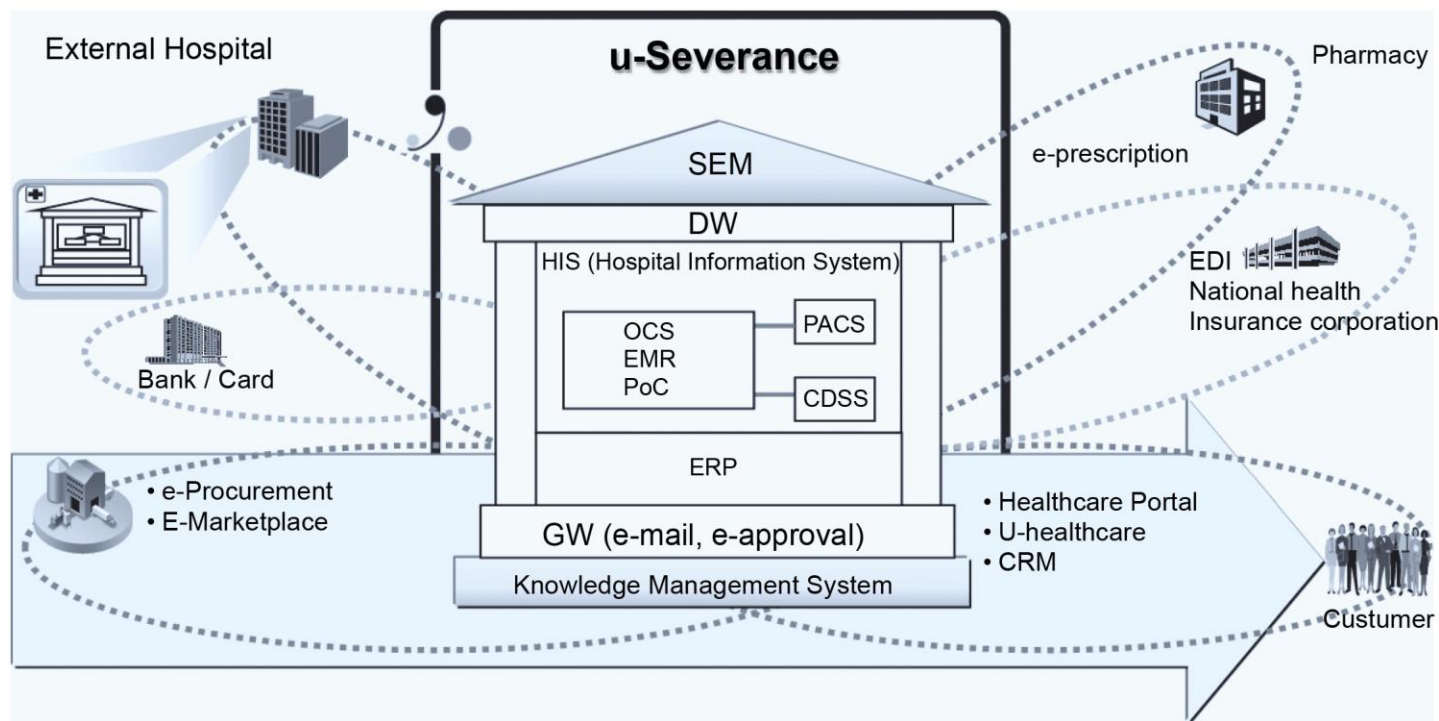

33

U-Hospital

U-Severance Hospital System

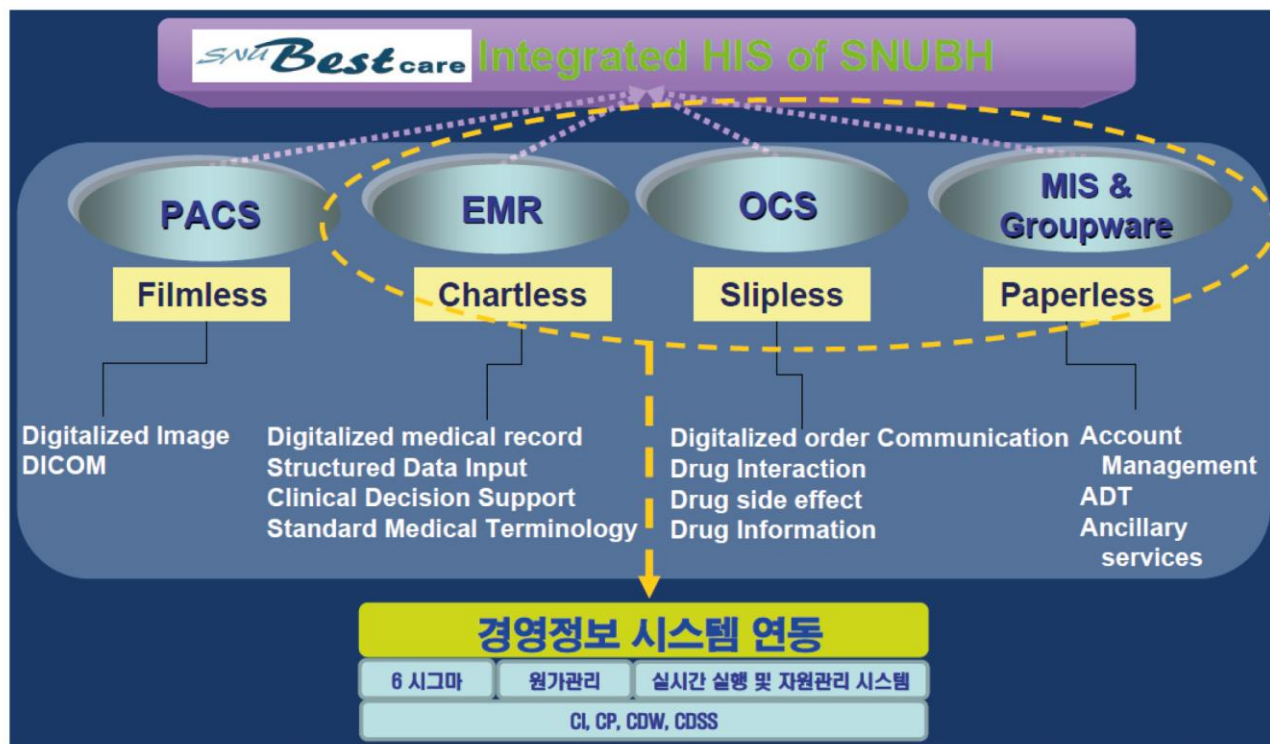

Integration by Standard (DICOM, HL7) IHE

V. HIS & u-Healthcare in SNUBH-BESTCare

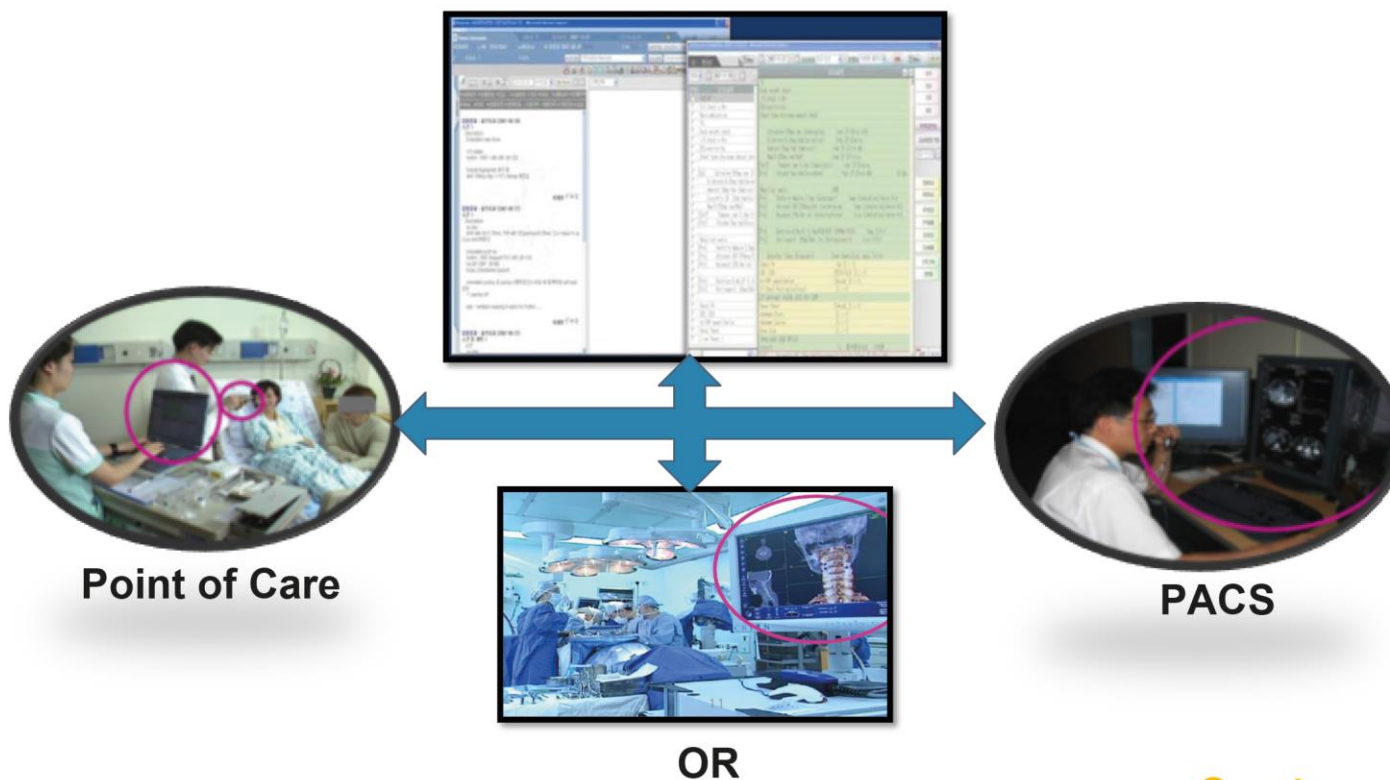

35

BESTcare system-May 10, 2003-2009
(EMR, OCS, PACS, MIS)

Courtesy of SNUBH

HIS-EMR, OCS, PACS

Courtesy of SNUBH

- **DICOM plays an important role of PACS development**
- **Success of PACS plays a window to EMR development**
- **Dream of u-Hospital project becomes reality of HIS w/ slipless, filmless, chartless paperless**
- **4less-HIS requires continuous efforts of DICOM, HL7, IHE societies**

Thank you for your attention

MEDICAL **P**HYSICS AND **I**MAGING **L**AB

Medical Physics & Imaging Lab.

Wonju-LINC, Yonsei University
