Submission Date	2025-04-07

Change Number	CP-2543
Log Summary:	Replace retired orphan SNOMED code 244251006
Name of Standard	PS3.16
Rationale for Change:	<p>In PS3.16, CID 3014 Coronary Artery Segment (extensible) has a Code (244251006, SCT, “1st Septal Coronary Artery”).</p> <p>That code is inactive in SNOMED, and it is an orphan in SNOMED having no parent, no children. It should be replaced.</p> <p>Note: This is BARI 17 (LAD septal perforator segments in [Scanlon 1999]).</p> <p><i>To editor: This CP has now the SCT code as suggested by WG-06 meeting 2025-06-17. The CodeMeaning was modified from “First Septal...” to “1st Septal...” to align with other CodedConcepts in CID3014. SNOMED RT and UMLS to be defined.</i></p>
